

CARL ROBINSON

I have created the Carl Robinson 3 Specialty Papers collection to honor the past, reflect the tradition and unveil the artistic processes that are used in designing wallpapers. I have worked in collaboration with highly skilled and respected artisans to preserve the beauty and continue the tradition of handcrafted wallcoverings. The hand-painted patterns are a true work of art. Each one is artistically rendered, individually hand screen printed on 50-foot long tables and finished to a durable, beautiful, high end product for the wall. The imported grasscloths and silks are rotary-printed using advanced print technology, to create a look based in tradition yet relevant to today's interiors. The inspired embroideries are hand worked and printed on the finest custom colored non-woven paper in a stunning neutral palette. The use of metallic threads makes these pieces truly special. The combination of classic screen-printed damasks on specialty cork and mylar substrates was created to celebrate the wallcovering looks of a bygone era, in a new and interesting way. This collection represents my passion and desire to create wallcoverings of the highest quality and innovative designs for the most discerning of interiors.

— Carl Robinson
